Education

University of Warwick **Oct 2016 – Jul 2019**
BEng Hons Computer Science (**First Class**)

Experience

Software Engineer, Bloomberg LP **Nov 2021 - Dec 2022**

- Worked as part of the ESG Regulations team to ingest, calculate and display ESG data to over **350,000 clients**.
- Used **TypeScript**, **Python** and **C++** to develop a full-stack application that calculates how aligned a company is with sustainability regulations set out by the European Commission in the EU Taxonomy.
- Developed a comprehensive suite of unit, integration and system tests using **PyTest** and **gMock**. Ensured **100% code coverage**.
- Spearheaded the creation of the team's technical documentation, leveraging **GitHub Pages** coupled with a **CI/CD Jenkins** pipeline for automated publishing. This initiative significantly expedited onboarding for new team members.

National President, Krishna Consciousness Society **Aug 2019 - Jul 2020**

- Led a team of 10 to create a network offering spiritual wellbeing and life coaching to over 800 students across 30 universities.
- Used **React, HTML5, CSS3** and **RESTful APIs** to develop a web application. See KCSOC Studio below for more details.
- Created a new brand of nationwide, university wellbeing retreats by developing a fully functioning e-commerce website, which generated a revenue of **£7000** in the first 6 months.
- Used **Python** and **Google Apps Scripts** to automate admin tasks, such as data scraping and spreadsheet management.

Software Engineer, CreditSights **Aug 2018 - Sep 2018**

- Used **Python** and **Dash** to develop a bespoke data visualisation web app that displayed company revenue information.
- Processed data from spreadsheets using **Pandas** and displayed the data on interactive graphs using **Plot.ly**. Proved much faster than creating graphs manually in Excel and saved 10 hours each week.

Software Engineer Intern, Health Shared **Jun 2018 - Jul 2018**

- Collaborated with a team of web developers in a healthcare start-up to implement a responsive web application.
- Built a **Java** based data pipeline that requested data using the **NHS API** and updated a **Firebase Realtime Database**. Used **Node.js** to implement cloud functions that published user content to an open-access repository.

Personal Projects

KCSOC Studio - React, Material-UI

- Developed a **React** web application that fully automated graphic design and video editing processes.
- This tool allowed for any member, regardless of skill, to make professional media content and has 40 weekly users.
- Resulted in a significant increase in productivity, with the original designer saving a time of 15 hours per week.
- Utilised the **lodash** library to poll an **API endpoint** at a given interval to check the progress of a rendering video. Used components from the **Material-UI** library to help build the front-end. Implemented page routing using **React Router**.

Personal Website - Gatsby, React, GraphQL

- Used **Gatsby** and **React** to develop a personal website from scratch, to display CV and projects in an accessible way.
- Utilised **GraphQL** for data querying. Used **CSS media queries** to make the UI responsive for mobile devices.

InstaLytics - Vue.js, Express, Instagram Graph API

- Used **Vue.js** to build a **progressive web application** that queries the **Instagram Graph API** and displays business account metrics on an interactive dashboard with graphs.
- The application improves on Instagram's built-in analytics feature, by calculating additional metrics such as engagement rate, reach rate and follower growth rate.

IntelliQuote - Vue.js, Google Cloud Vision API, Algolia, Express

- Built an **AI** graphic design web tool with **Vue.js**, that generates professionally made graphics with quotes.
- **Google Cloud Vision API** returned image labels that were used to query an **Algolia search index** containing positive quotes. A matching quote was rendered onto the original image.

Technical Skills

Experience in **JavaScript ES6+, TypeScript, React, Python, Java, C++, Docker, HTML5, Photoshop, CSS3**, **SQL, Node.js, Git, Bash.**
